

Shameer Shaik – Software Engineer

Georgia, USA | +1-470-659-2196 | itsshameersamuel@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Open to Relocation

PROFESSIONAL SUMMARY

Software Engineer with 3+ years building and shipping production-grade full-stack applications using React.js, Node.js/TypeScript, and PostgreSQL/MySQL. Reduced production bugs by 50%, improved release velocity by 40%, and delivered 60% query performance gains. Consistently achieves 80%+ test coverage and CI/CD delivery in Agile teams. Adept at system design, cloud infrastructure (AWS/Azure), and translating complex requirements into clean, maintainable code at scale.

Portfolio: <https://shameer-shaik-portfolio.netlify.app/>

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, Python, HTML/CSS, Redux — performant, accessible, production-ready UIs

Backend: Node.js, Express.js, Python, Flask, REST APIs, authentication (JWT, RBAC), system design, microservices

Database: PostgreSQL, MySQL, DynamoDB, NoSQL, schema design, query optimization, connection pooling, indexing strategies

DevOps & Cloud: Docker, CI/CD (GitHub Actions, Azure DevOps), AWS (EC2, S3, RDS, CloudWatch), Azure, Datadog, Grafana

Testing & Quality: Jest, Mocha, Cypress, Supertest — 80%+ code coverage, unit/integration testing, structured code review

Data & Analytics: ETL pipelines, Python (Pandas, NumPy), Power BI, Tableau, SQL optimization, Scikit-learn

PROFESSIONAL EXPERIENCE

Software Engineer & Data Analyst | Dept. of Water Resources, Gwinnett County |

May 2025 – Present

- **Improved query response time by 60%** and ETL efficiency by 40% by redesigning PostgreSQL schemas with advanced indexing and optimizing pipelines processing thousands of daily geospatial records.
- **Delivered 3 React.js production applications** including real-time operational dashboards, a gamified career roadmap, and a full curriculum learning platform — all deployed on AWS EC2 with CloudWatch monitoring.
- **Cut manual anomaly identification time by 80%** by implementing real-time alerting systems integrated into production REST API workflows serving county water infrastructure operations.
- **Reduced MTTD by 80%** by implementing real-time alerting and automated anomaly detection integrated into production REST API workflows, enabling rapid root cause isolation for county water infrastructure incidents.

Full Stack Software Engineer | Veltris Technologies |

Jan 2023 – Jun 2024

- **Improved MySQL query performance by 30%** across distributed systems by architecting scalable Node.js/TypeScript REST APIs with React.js frontends serving production workloads.
- **Reduced production bugs by 50%** by achieving 80%+ code coverage via Jest, Mocha, and Supertest; enforced structured code review across a 6-person engineering team.
- **Reduced release cycle time by 40%** by implementing CI/CD pipelines using GitHub Actions and Azure DevOps with Docker containerization ensuring consistent cross-environment deployments.
- **Improved team delivery velocity by 25%** by mentoring 2 junior developers on React.js best practices; led MySQL schema migration achieving sub-100ms response times across production workloads.
- **Reduced database load by 35%** by migrating legacy MySQL queries to prepared statements with connection pooling, improving security and query execution efficiency.

Graduate Teaching Assistant & Primary CS Instructor | Kennesaw State University |

Aug 2024 – May 2026

- **Instructed 380+ students across 4 semesters** in React.js, Node.js, SQL optimization, Python, and database design.

PROJECTS

CasePilot - Legal-Tech SaaS Platform (Launching Soon) | [Private Repo](#) | Next.js 14, Supabase, React.js, Node.js, PostgreSQL, AWS 2025-2026

P1 Mock-up Design - Live Demo: <https://legalflow-tracker.netlify.app/login>

- **Architected** a production-grade, multi-tenant B2B SaaS platform for solo attorneys and small law firms — built with a founding team including a marketing lead and investor/strategist.
- Implemented **Row-Level Security (RLS)** for tenant data isolation and Role-Based Access Control (RBAC) across attorney, paralegal, admin, and client roles with scoped dashboards and permission sets.
- **Built full subscription and billing management**, automated time tracking/hours logging, case and matter management, secure client portal, and document management workflows.
- Designed **authentication and authorization architecture** with all auth operations proxied through server-side API routes - ensuring zero client-side credential exposure.
- Delivered full-stack SaaS architecture with serverless AWS integrations, CI/CD deployment, and RLS-enforced PostgreSQL schema - currently being prepared for commercial release with law firm partners.

SprintHub — Full-Stack Project Management Tool |

React.js, Node.js/TypeScript, PostgreSQL, Docker, AWS

2024

- Achieved sub-100ms API response times with normalized PostgreSQL schema; 85% test coverage via Jest + Supertest; CI/CD via GitHub Actions; Dockerized and deployed on AWS EC2.

VoiceScribe — Text-to-Speech Application |

TypeScript, Web Speech API, React.js

2026

- Delivered 5+ premium features at \$0 cost by building a TypeScript TTS tool with event-driven audio state management, strong typing, and cross-browser compatibility.

EDUCATION

M.S. Data Science and Analytics | *Kennesaw State University, Georgia, USA*

May 2026

B.Tech Computer Science and Engineering | *RGUKT – IIIT, India*

2023

Certifications: MERN Stack Development (2023) | Microsoft Certified: Power BI Data Analyst Associate (2025)
