

PROFESSIONAL SUMMARY

Software Engineer with **4+ years** of experience designing, building, and shipping production applications using React, TypeScript, Node.js, PostgreSQL, AWS, and Docker. Proven track record leading technical delivery end-to-end — from system architecture and API design to query optimization and CI/CD automation — across commercial software teams.

TECHNICAL SKILLS

Frontend	React.js, TypeScript, JavaScript, HTML, CSS
Backend	Node.js, Express.js, Flask, REST APIs, JWT & RBAC authentication, microservices, system design
Database	PostgreSQL, MySQL, schema design, query optimization, indexing strategy
DevOps & Cloud	Docker, GitHub Actions, Azure DevOps, CI/CD, AWS
Testing & Quality	Jest, Mocha, Cypress, Supertest — unit/integration testing, 80%+ coverage, structured code review

EXPERIENCE

Project Technical Lead & Software Engineer <i>Gwinnett County Department of Water Resources</i>	May 2025 — Present <i>Georgia, USA</i>
- Architected and built a TypeScript-based automation and analytics platform that replaced manual workflows, enabling real-time processing of 1,0000+ resident survey responses and self-service reporting for cross-functional teams. - Directed technical delivery as sole project owner — requirements gathering, system design, and stakeholder alignment — while benchmarking satisfaction metrics against JD Power, Qualtrics, and Alchemer industry standards to inform county-wide program strategy.	
Software Engineer <i>Veltris Technologies</i>	Jan 2022 — Jul 2024 <i>India</i>
- Improved MySQL query performance by 30% across distributed systems handling 250K+ records by redesigning indexing strategy and query execution plans. - Built and maintained production full-stack features using TypeScript, Node.js, and REST APIs, implementing secure encryption/decryption workflows and database schema migrations that improved system reliability and maintainability. - Mentored 2 junior developers on backend architecture and code-quality standards, shortening code-review cycle time.	
Founder & Full-Stack Software Engineer <i>CaseFlowPilot</i>	Mar 2026 — Present <i>Georgia, USA</i>
- Designed and built a multi-tenant legal SaaS platform end-to-end using React, TypeScript, Node.js, and PostgreSQL, owning architecture, authentication, and deployment. - Implemented Row-Level Security (RLS) and Role-Based Access Control (RBAC) across four user roles — Admin, Attorney, Paralegal, Viewer — enforcing tenant-level data isolation.	
Graduate Teaching Assistant CS Instructor <i>Kennesaw State University</i>	Aug 2024 — May 2026 <i>Georgia, USA</i>
Instructed 380+ students across programming, computer networks, cybersecurity, and data communications courses, and built software-based lab environments that translated complex concepts into hands-on curriculum.	

PROJECTS

AccentForge — AI-Powered Language Learning SaaS <i>TypeScript, React, Node.js, ElevenLabs</i>
- Architected and developed an AI-powered language learning SaaS that uses a quest-based learning experience to help users practice pronunciation, conversational phrases, and accent development. - Integrated ElevenLabs to generate high-quality speech content, building an automated audio pipeline that retrieves generated audio and prepares it for use across the application. - Designed a layered learning experience with interactive quests, speech-based lessons, and progressively structured content to create a more engaging alternative to traditional language-learning workflows.
SprintHub — Full-Stack Project Management Tool <i>React, Node.js/TypeScript, PostgreSQL, Docker, AWS</i>
Achieved sub-100ms API response times through a normalized PostgreSQL schema, backed by 85% test coverage via Jest and Supertest, and deployed a Dockerized CI/CD pipeline via GitHub Actions to Azure.

EDUCATION & CERTIFICATIONS

M.S. in Data Science and Analytics , Kennesaw State University, Georgia, USA	May 2026
Bachelor's in Computer Science and Engineering , RGUKT — IIIT, India	
MERN Stack Development Certification	2023

Extracurricular

Beyond the keyboard: cooking, rockClimbing, hostingDinners/boardGames, hiking, camping, volunteering, ++
