

Shameer Shaik - Data Analyst

Georgia, USA | +1-470-659-2196 | itsshameersamuel@gmail.com |
LinkedIn | GitHub | [Portfolio](#) | Open to Relocation

PROFESSIONAL SUMMARY

Results-driven **Data Analyst** with 3 years of experience turning complex operational and community data into executive-ready insights for government and enterprise stakeholders. **Built a full analytics program from scratch** at Gwinnett County DWR — delivering automated Power BI dashboards, ETL pipelines processing thousands of daily records, and a county-wide survey research initiative. Skilled in SQL, Python, Power BI, and translating data into decisions.

TECHNICAL SKILLS

Data Analysis: SQL (PostgreSQL, MySQL), Python (Pandas, NumPy, SciPy), **Excel** (pivot tables, VLOOKUP, Power Query, advanced formulas), Google Sheets, R, SAS

Visualization & BI: **Power BI** (DAX, data modeling, Power BI Service, dashboards), Tableau, Matplotlib, Seaborn, Plotly, Google Data Studio

Database & ETL: Query optimization, ETL pipeline design, data warehousing, data modeling, indexing strategies, data validation, data governance, SOPs

Statistical & Analytics: Hypothesis testing, A/B testing, regression analysis, anomaly detection, statistical inference, Scikit-learn, **stakeholder** requirements gathering

Tools & Cloud: Git, AWS (EC2, CloudWatch, RDS), Azure, Apache Airflow, Jupyter Notebooks, Google Analytics, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Lead Data Analyst | Dept. of Water Resources, Gwinnett County |

May 2025 – Present

- **Built** Gwinnett County DWR's entire **survey analytics function from the ground up** — scoped, secured budget and executive approval for a 3-year data strategy roadmap and delivered a production-grade analytics system within 2 months.
- **Reduced executive reporting prep time by 75%** by building automated Power BI KPI dashboards tracking schedule adherence, budget utilization, and operational metrics across county water infrastructure.
- **Cut manual defect identification time by 60%** by applying SQL-based anomaly detection to 10K+ daily operational records, surfacing schedule variances and risk indicators in near real time.
- **Analysed 1200+ community survey responses** across 4 campaign waves for the "Your Water Your Say" initiative; designed and presented multi-wave trend reports to county executives, informing outreach strategy and departmental planning decisions.
- **Reduced manual reporting effort by 80%** by developing SOPs, data governance documentation, and automated ETL pipeline workflows adopted across 3 operational teams.

Graduate Teaching Assistant & Primary CS Instructor | Kennesaw State University |

Aug 2024 – Present

- **Instructed 380+ students across 4 semesters** in SQL optimization, Python data analysis, and data-driven decision-making.

Full Stack Software Engineer — Analytics Focus | Veltris Technologies |

Jan 2023 – June 2024

- **Improved MySQL query performance by 30%** across distributed systems processing 250k records by redesigning data pipelines and reporting tools delivering analytics to cross-functional teams.
- **Improved stakeholder reporting turnaround by 40%** by conducting A/B testing and presenting statistical validation findings through Power BI and Tableau visualizations.

PROJECTS

Child Welfare Analytics Platform | Python, Pandas, Scikit-learn, Power Bi

2025

- Identified high-risk cases (housing instability, dropout likelihood) across welfare records using Random Forest and XGBoost models; achieved 89% classification accuracy and generated case-priority reports enabling social workers to act on data-driven recommendations.
- Designed Power BI visualizations translating model outputs into plain-language risk summaries, making complex predictive analytics accessible to non-technical stakeholders.

House Price Prediction Platform | Python, Scikit-learn, PostgreSQL, Power Bi, Flask, AWS

2024

- Provided buyers and sellers a self-serve pricing tool for market-informed decision-making, powered by feature engineering across 30+ variables; achieved 92% R^2 prediction accuracy with sub-second PostgreSQL queries on AWS.
- Deployed end-to-end Flask REST API with interactive Power Bi dashboards, demonstrating full analytics pipeline from raw data ingestion to stakeholder-facing visualization.

EDUCATION

M.S. Data Science and Analytics — Kennesaw State University, Georgia, USA

May 2026

Bachelors of Tech Computer Science and Engineering — RGUKT – IIIT, India

2023

Certifications: Microsoft Certified: Power BI Data Analyst Associate (2025)
